AIM

AIM Harvest Summary: Weeks of 8/22 and 8/29

3 person crew (2 divers)

Dive Leader: Kyle Jaquis

Week 5

Monday- Point o' Pines up east shore covering sunset cove and all hot spots in the area (rock piles etc.) into bay just north of boys camp. 120 Plants on this swim. All new growth single stems.

Tuesday- Knoll to the north west of Luke's 25 plants. Bay north of boys camp into northeast bay. 1/2 bag. Most plants were found on a matted rock pile just north of the boys camp. New growth single stems.

Wednesday- Northeast bay into big rock cove and around island. 1 bag Plants were mostly found on the western shore of northeast bay and around the island. A small patch in the swampy area in the far north was found. In Big Rock cove only 12 plants were found. Low density new growth.

Thursday- Swam the western shore from big rock cove south toward the 3 islands. Only 40 scattered plants were found along the steep drop off. This swim will be continued on Monday.

2.5 bags total – 62.5 lbs

Week 6

Monday- Swam from the Boys Camp North to the small island with extensive line-swim coverage of all areas. 3 plants harvested, an incredible low.

Tuesday- Swam the far Northern Bay with 5 bags harvested near the floating docks close to the emergent plant growth in the shallows.

Wednesday- Swam from Point O Pines South to the completion of the Grassville Road area. Only 5 plants harvested.

Thursday- Swam all of Sunset Cove (7 plants harvested) and then targeted the two rocky knolls, 1 near the Brant Lake Farm (1 plant harvested) and 1 East of Terry Lynch's (0 plants harvested).

5.25 bags total – 131.25 lbs
